Policy number: 0000000

Lodge Name: Xxxxxxxxx

Please provide any information which might assist our Response Coordinator in providing you with assistance

Next
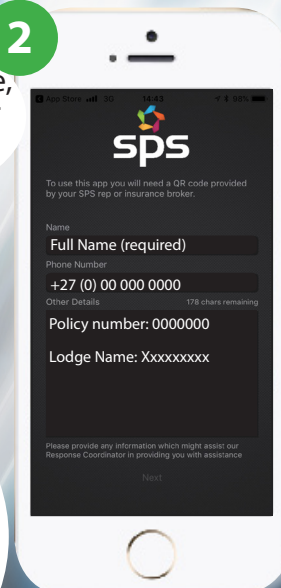

When faced with a crisis,
SATIB24's incident management service,
which is housed on the SPS-SOS App (free download
on the APP store/ Google Play), provides you with 24/7 direct
access to SATIB24's incident management service.

Once the panic button is pushed SATIB24's incident management's App will
confirm the call through a 'dial' prompt. Once 'Yes, dial' is selected, the App
will immediately send your location (via GPS co-ordinates), and policy
details to SATIB24's operations centre.

The SATIB24 operation centre is managed by incident management
specialists. They guide you safely through your incident
and coordinate the required medical and security
responses, limiting loss and protecting your
brand and personnel.
